

NAVADEEP THIRUNAGARI

Data Analyst | SQL · Python · Power BI · Customer & Business Analytics

+91 6305880325 | thirunagarinavadeep4@gmail.com | Hyderabad, Telangana

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with experience across Business Intelligence, SQL analytics, and Python-based data analysis through two internships and end-to-end analytics projects spanning 140,000+ customer and transaction records. Skilled in transforming raw data into actionable business insights using SQL, Power BI, Python, and Excel. Built dashboards covering \$19.5M in e-commerce revenue, customer segmentation, retention analytics, and KPI reporting. Strong foundation in business analytics, stakeholder communication, and data-driven decision-making.

CORE SKILLS

Languages & Analysis: Python (Pandas, NumPy, Scikit-learn), SQL (Joins, Subqueries, Window Functions, CTEs), Statistical Analysis, EDA, Data Wrangling, Data Validation

Machine Learning & AI: Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP)

BI & Visualization: Power BI (DAX, Power Query, Star Schema, Row-Level Security, Data Modelling), Data Storytelling, KPI Reporting, Dashboard Development, Reporting Automation

Databases & Tools: MySQL, PostgreSQL, Excel (XLOOKUP, INDEX-MATCH, Power Query, Pivot Tables), Git/GitHub, VS Code, Jupyter Notebook

Analytics Specialties: Customer Segmentation (RFM, CLV), Cohort Analysis, Risk Analytics, Trend Analysis, Root Cause Analysis, Business Intelligence

WORK EXPERIENCE

Power BI Intern — Cognifyz Technologies

Apr 2025 – May 2025

- Designed and deployed 3 interactive Power BI dashboards using DAX, Power Query, and relational data modelling, enabling business users to monitor core KPIs and perform self-service analysis.
- Configured 10+ DAX measures and relational data models to enable filtering and drill-down analysis, reducing manual reporting effort for stakeholders.
- Translated requirements gathered from 2 mentors into dashboard specifications, improving report accuracy across 3 review cycles and reducing rework.

Data Science Intern — Pinnacle Labs

Feb 2025 – Mar 2025

- Cleaned and pre-processed 5+ structured datasets using Python (Pandas, NumPy) and SQL, cutting missing/inconsistent records by ~20% and improving downstream analysis reliability.
- Conducted exploratory data analysis across 10+ variables to identify business drivers, delivering 3 data-driven recommendations that fed directly into stakeholder decisions.
- Authored 4 written analysis reports for non-technical stakeholders, simplifying technical findings and shortening review-cycle turnaround.

PROJECTS

E-Commerce Analytics & Customer Retention Dashboard

Power BI · Python · Pandas · SQL · Customer Analytics

GitHub: <https://github.com/ThirunagariNavadeep/E-Commerce-Customer-Analytics-Retention-Dashboard>

- Situation:** Business had 95,000+ orders and 92,000+ customer records representing \$19.5M+ in revenue, with no unified view of sales trends or retention drivers.
- Task:** Analyse the transactional data to uncover revenue and retention drivers, and build a reporting tool the business could use on an ongoing basis.
- Action:** Queried and processed order and customer data using SQL and Python/Pandas; segmented 92,000+ customers into 6 behavioural groups using RFM and CLV analysis; ran cohort retention analysis on repeat-purchase behaviour; built a 5-page Power BI dashboard with 25+ interactive visualizations and KPIs (Executive Summary, Customer, Product, RFM Segmentation, CLV).
- Result:** Delivered a reusable Power BI dashboard designed to support ongoing sales and retention analysis, with RFM/CLV segmentation surfacing engagement patterns and generating actionable recommendations for improving customer retention.

Banking Customer Risk & Loan Analytics Dashboard

Power BI · Python · Pandas · SQL · NumPy

GitHub: <https://github.com/ThirunagariNavadeep/Banking-Customer-Risk-Loan-Analytics-Dashboard>

- **Situation:** Bank held 45,000+ customer records spanning risk, loan, and campaign data with no centralized way to identify high-value or at-risk customers.
- **Task:** Segment the customer base and identify the key drivers of loan and subscription behaviour <https://www.linkedin.com/in/thirunagari-navadeep/> to support targeted retention and lending decisions.
- **Action:** Queried and evaluated 15+ demographic, financial, and campaign attributes using SQL and Python; segmented 45,000+ customers into 4 value tiers (High, Medium, Low, VIP) using RFM and CLV analysis; designed a 4-page interactive Power BI dashboard with 20+ KPIs covering customer value, loan performance, and campaign effectiveness.
- **Result:** Produced 5+ data-driven recommendations translating the segmentation and risk analysis into a targeted retention and lending strategy framework.

EDUCATION

B.Tech in Artificial Intelligence & Data Science Guru Nanak Institute of Technology, Hyderabad GPA: 7.77	Nov 2022 – Expected Jul 2026
Intermediate (MPC) MPCS R Junior College, Hanamkonda GPA: 7.89	May 2022
SSC (10th Standard) Tejaswi High School, Hanamkonda GPA: 9.5	Mar 2020

CERTIFICATIONS

- Google Data Analytics Essentials — Google
- Introduction to Data Science — Cisco Networking Academy
- Introduction to Data Science Job Simulation — Commonwealth Bank (Forage)

LEADERSHIP & VOLUNTEERING

President — <i>Data Pioneers Club</i>	Hyderabad
• Led a 15+ member student analytics community as President, organizing 5+ technical workshops with cross-functional teams to promote data analytics knowledge-sharing on campus. • Mentored club members and organized 8+ events, growing active participation through structured planning and clear communication.
